Mark,

Hashed out an ES&T Letters manuscript regarding the NJ water work. Please take a look and let me know what else you would like to include/discuss. Also, one or more of the figures needs to move to the supplemental information.

I need to export the full method files for the LC-MS and Compound Discoverer sequences from the instrument, they will go in the SI when that's the last thing I still need to do, so those spaces are blank right now.
